EXPERIENCE

Full Stack Developer (Personal Projects)
2024 – Present

- Developed multiple web applications using HTML, CSS, JavaScript, Bootstrap, React, Python and Django.
- Worked with databases like MySQL and PostgreSQL.
- Focused on creating responsive and user-friendly websites.

EDUCATION

Bachelor of Science in Computer Science and Engineering (B.Sc. in CSE)

Bangladesh University of Business and Technology (BUBT)

Status: Ongoing

PROJECTS

AI-Driven Research Topic Mapping and Recommendation System (ThesisBridge)

Developing an AI-powered web application using Python and Django to recommend research topics and match students with suitable supervisors. Integrates Machine Learning, NLP, Sentence-BERT, TF-IDF, and semantic similarity techniques to analyze research interests, skills, and academic profiles. Features intelligent topic recommendations, supervisor matching, and AI-driven research insights.

Single Vendor E-commerce Website

Developed a full-featured Django-based e-commerce web application with separate modules for user authentication, product browsing, product search, shopping cart, checkout, order processing, payment management, delivery tracking, and customer reviews. Implemented user registration, login, profile management, product details, order history, payment status, and review functionality. Designed responsive interfaces using Bootstrap 5, HTML, CSS, and JavaScript.

SKILLS

Web Technologies

- HTML5
- CSS3
- JavaScript
- Bootstrap
- React

Backend & Database

- Python
- Django
- MySQL
- PostgreSQL

Tools & Others

- Git & GitHub
- VS Code
- Figma

AWARDS

Awards & Achievements

- **2nd Runner-Up** – Inter-University Project Showcase (3rd Year, SDP-300) for *ThesisBridge: AI-Driven Research Topic Mapping and Recommendation System*.
- **3rd Runner-Up** – Inter-University Programming Contest (4th Year), achieved twice as a team.

Technologies: Python, Django, HTML5, CSS3, Bootstrap 5, JavaScript, SQLite.

S4M Trust Bank – Banking Management System

Developed a full-stack simulated banking application using Django and Python for backend development and React for the frontend. Implemented user registration, authentication, bank account management, deposit and withdrawal operations, transaction history, and balance validation. Used PostgreSQL for database management and secure transaction processing to maintain accurate account balances.

Technologies: Python, Django, React, PostgreSQL, HTML5, CSS3, JavaScript, Bootstrap 5.

Blood Donate & Request System

Developed a Django-based blood donation platform to connect blood donors with recipients. Implemented user registration, login, donor profile management, availability updates, blood group and location-based donor search, urgent blood request creation, and request details management. Designed a responsive and user-friendly interface using Bootstrap 5.

Technologies: Python, Django, HTML5, CSS3, JavaScript, Bootstrap 5, SQLite.

AI-Powered Job Application Tracker

Developed a full-stack Django-based web application to help job seekers organize and track their job applications efficiently. Implemented user authentication, application management (Create, Read, Update, Delete), dashboard analytics, application status tracking, job deadline management, and search and filtering functionality. Integrated AI-powered features to assist users in managing their job search activities and designed a responsive user interface using Bootstrap 5.

Technologies: Python, Django, HTML5, CSS3, Bootstrap 5, JavaScript, SQLite, AI Integration.

Pet Adoption & Rescue Platform

Developed a full-stack Django-based web application to connect rescued pets with potential adopters. Implemented secure user authentication, pet categorization, advanced filtering by animal type, breed, gender, adoption status, and location. Added a favorites system, web pagination, and a RESTful API using Django REST Framework with token-based authentication and API pagination. Designed a responsive and user-friendly interface for mobile and desktop devices.

Technologies: Python, Django, Django REST Framework (DRF), HTML5, CSS3, Bootstrap 5, SQLite, PostgreSQL, Git, GitHub, Postman
